

Greenbank

Bespoke
Financial advisers

For professional advisers only

Greenbank provide ethical and sustainable investment services for private clients, charities, trustees, institutions and professional partners. We are one of the most experienced teams in the sustainable investment field and have been helping to drive change through ethical and sustainable investment for more than 20 years.

Our in-house ethical, sustainable and impact (ESI) research team is one of our core strengths, and our active approach to engagement with companies complements our investment analysis.

We strive to be the natural home for those who want to align their investments with the change they want to see in the world. We provide sustainable investment as standard, not as an add on.

Greenbank was created by people passionate about the use of finance as a force for good and we share this passion with our clients. Our team continues to grow, with people who share our vision.

Our Bespoke service is a discretionary service for clients with amounts of £500,000 or more to invest in a portfolio.

It allows your clients to specify areas of interest (for example, climate change, biodiversity loss or social inequality) and investments they want to avoid, highlighting their personal choices of positive alignment to sustainable investment themes.

Your clients' investments can be held within a standard taxable account or a wrapper such as an Individual Savings Account (ISA), Junior Individual Savings Account (JISA), Self-Invested Personal Pension (SIPP), Trust or Offshore bond.

Our Liquidity, Equity-type risk and Diversifiers (LED) investment process includes six risk-rated investment strategies that are aligned to their respective risk level.

They set out the high-level structure of a portfolio for that risk level and serve as a useful way to illustrate and measure our investment framework and process. Within the asset allocation parameters of these strategies, we can tailor portfolios according to a client's individual situation and financial objectives, taking into account any personal preferences they may have.

The asset allocation shown for each strategy reflects the neutral weighting for each asset class range. Inflation is measured as the Consumer Price Index (CPI) from the UK's Office for National Statistics. Sterling cash is measured as SONIA (sterling overnight index average) from the Bank of England. Prior to 1 January 2021 cash was measured as 3-month UK LIBOR from the Intercontinental Exchange (ICE). ¹The long-term return objectives for each strategy are based on the suggested minimum time horizon and are shown relative to the returns from cash (as measured by short-term interest rates) or the annual rate of inflation (as measured by the Consumer Price Index). They are based upon long-term inflation forecasts.

For more information about our LED approach, and the role of our in-house research team, our engagement activities (including voting), and the sustainability standards for investments that are included in Greenbank Bespoke portfolios, please read our **Greenbank Brochure**.

Greenbank are experienced in handling the transfer of existing portfolios and managing the reorganisation of portfolios over time to take account of market opportunities and to operate within agreed tax constraints.

The value of investments and the income from them may go down as well as up and you may not get back what you originally invested.

Our relationship with you

As your client's Adviser, you retain control of the client relationship

You will have responsibility for:

- providing the information about your client
- assessing your client's tax position
- the suitability of any recommendation provided to your client including their risk level
- assisting your client with understanding the investment solution and associated risks.

If it is appropriate for your client, we will ask them to complete our Ethical Questionnaire to record their specific ethical or sustainability preferences.

The Greenbank investment manager will create an investment proposal document showing the type of investments that will be in your client's portfolio, that you can review and discuss with your client.

Once agreed, the investment manager will build your client's portfolio and actively manage and monitor it, utilising your client's ISA and CGT allowances.

Communicating with you

You will have a direct relationship with a Greenbank investment manager, including meetings for you and your client when you need them

You will have online access to your client's up-to-date portfolio valuations and cash transaction history via the MyRathbones app. (There is an Adviser View on MyRathbones that shows all your Greenbank clients)

You will have ongoing communication and support of your Greenbank investment manager and their team, either by phone, email, Microsoft Teams, or the MyRathbones digital option

Reporting

Your clients will receive **quarterly valuations** which include an analysis of their portfolio performance relative to market benchmarks, details of stock and cash movements, and the income generated by their portfolio.

They will also receive detailed **annual tax reports**.

Your clients can receive far more than just a quarterly financial summary of their portfolio.

They will want to understand where their money is invested and how their portfolio aligns with their sustainability objectives, so we can also provide:

- **Ethical screening summaries**, providing an overview of how portfolio companies meet your client's ethical investment policy or criteria.
- **Annual Ethical Review (AER)** – a summary of social and environmental performance of portfolio holdings, relevant to your client's portfolio investments.
- **Sustainable Development Themes report** for your client's portfolio, to use in your client review meetings. This shows
 - how your client's portfolio is mapped against Greenbank's eight sustainable development themes
 - a breakdown of your client's investments according to different impact goals.
- **Weighted Average Carbon Intensity (WACI) report** – if your client has a specific interest in their carbon footprint, this report shows their portfolio's exposure to carbon-intensive companies, compared to a range of relevant benchmarks (on request).

We have obtained compliance with the Global Investment Performance Standards (GIPS) and can provide verified performance data and further explanation of the guidelines, on request.

If you use the Intelliflo platform we can link directly to your back office system.

Keeping you and your clients informed

- We can invite you and your clients to our annual Greenbank Investor Day and our regular webinar events on cutting edge sustainable investment topics
- You and your clients will also receive a copy of our annual Greenbank Investor Day Review and our annual Engagement Review
- We publish regular thought leadership posts and our Greenbank monthly market commentary on our website. (We can send you a pdf of the monthly market commentary on request)
- We highlight our activities as leaders in the sustainable finance industry on our LinkedIn and Twitter accounts
- We also run certified CPD events and teach-ins on sustainable investment industry topics specifically for Advisers
